Georgia, VT

Owner: Green Mountain Power
Scott Lehman, Substation Designer
(802) 747-5747

Architect:
GMP designed

Superintendent:
Aaron Miner

Contract: Lump Sum

Completed: December 2014

Naylor & Breen's Site/Concrete Divisions have worked with Green Mountain Power on several projects. Including the expansion and upgrade of existing substations, as well as building completely new substations, such as Ballard Rd. Our site division acted as the primary general contractor on this project, coordinating subcontractors as well as working closely with GMP's in-house forces. We completed the project ahead of schedule, leaving the facility secure and ready for structures to be set by the owner.
