

NAYLOR & BREEN BUILDERS, INC.

G-Stone Commercial | Recon Building
Middlebury, Vermont

This project consisted of the new construction of a 12,000 sf, 7-bay metal pre-engineered building for the re-conditioning services for a car dealership. Naylor & Breen worked with the architect, NBF and Essex Steel on the building design and engineering.

This included adding an energy efficient R19 and R38 simple saver insulation package with a 26 gauge exterior cladding and a 29 gauge interior cladding to all walls and ceilings.

A high grade commercial epoxy finish was applied on the floor in the race car shop, with a mid-grade commercial epoxy to the storage area,

and sealed concrete floors to the recon area. Naylor & Breen performed the site work, concrete and interior finish carpentry, as well as managing the permitting process.
