Truex Cullins
Matthew Wheaton
(800) 227-1076 x 248

Project Manager:
Tanner Romano
Superintendent:
John Crossman
Contract Type/Value:
Stipulated Sum

This renovation project consisted of interior renovations to the science department and minor renovations to the rooms below each lab during summer break. Work included some demolition, electrical and plumbing, storage, and casework. The existing trim and details from each classroom were preserved and restored. Matthew Wheaton, the Project Architect from TruexCullins describes his experience on this project with Naylor & Breen. *"The Poultney High School Science Lab Renovation was a success in part due to the leadership and quality control by Naylor & Breen. Typical to all school summer construction projects is a compact schedule, and Naylor & Breen coordinated and executed this aggressive schedule to finish on time and under budget, enabling the Owner to further enhance the project. We found Naylor & Breen easy to work with, competent on all levels, and a team player. TruexCullins looks forward to future projects with this company."*
