

# NAYLOR & BREEN BUILDERS, INC.

TenneyBrook Market  
Castleton, Vermont

Castleton Four Corners has a new look, since the Tenney Brook Market opened its doors in March of 2010. The sleek, semi-modern design replaces an old, typical style convenient store. The upgrade makes for quite a before and after story (See below). The new building boasts an open floor plan with room to move for all who enter. Its vaulted, white ceiling, and whimsical light fixture layout adds a bit of fun to the space. There is nothing 'typical' about it. A custom maple trim detail wraps the upper walls of the store, hat was finished to match the wood doors throughout.

Before

Not only is the building modern in its aesthetic design, but also in its technical design. The entire building exterior is sheathed with an unbroken layer of insulation, creating a state of the art building envelope. Although the store front is mostly glass, the owners opted for a very high-end glass to further enhance the comfort for its patrons. Customers can also enjoy a walk-in Beer Cavern, with an automatic door for 'hands-free' shopping.

Project: Midway Oil  
Castleton, VT

Owner: MT Associates
