

NAYLOR & BREEN BUILDERS, INC.

Mendon Town Office
Mendon, Vermont

This beautiful designed traditional New England style town office building is made of a wood framed structure, with clapboard siding and an metal roof. Naylor & Breen worked collaboratively with the town committee and the Architect throughout the project. N&B performed the site work, concrete, framing and the interior and exterior finishes. The interior counter tops and cabinetry were crafted by Hawk Hill Cabinetry & Custom Woodwork. In order to install the sewer line, a challenging boring process was used, boring several hundred feet underneath and across busy Route 4 to the municipal line.
