

NAYLOR & BREEN BUILDERS, INC.

Private Residence
Chester, Vermont

This project consisted of several phases including a post & beam addition with the construction of a massive interior and exterior fieldstone fireplace (seen above). The renovation of the attached former pole barn was redesigned on the first floor to a large entryway, laundry room, full bathroom and the second floor renovated into a large master bedroom wing. A new three-car garage was then attached to the renovated barn. There have been more renovations to the main farmhouse as well. Additional amenities include high-velocity air conditioning, extensive landscaping with and an outdoor stone patio to compliment the exterior fireplace.

Project: Private Residence
Additions and Renovations
Chester, Vermont

Designer: Nancy Leary Design
Project Manager: Robert Naylor
Superintendent: Donald Houle
Completed: February 2005
