Project Manager:
Tanner Romano
Superintendent:
Matt Kowalski

Contract: Time and Materials

Completed: December 2012

Complete interior renovation which involved all new wiring with in house smart controls and whole house integrated lighting and sound system. Five bathroom remodels with all new fixtures and finishes as well as custom cabinetry by Hawk Hill Woodwork.

Newly remodeled kitchen with a contemporary finish. All new flooring, paint and finish work throughout the house. The main floor of the house originally consisted of five different levels, after major structural modifications the layout is now three floors with a much more open and efficient floor plan.
