

NAYLOR & BREEN BUILDERS, INC.

“SILVER” LEED Certified Private Residence
Plymouth, Vermont

SILVER RATED LEED CERTIFIED HOME

The was a unique and challenging project for Naylor & Breen, initially starting in the winter by pouring the foundation during extreme conditions. In order to reach the LEED Silver Certification, the use of energy-efficient heating and cooling systems and triple glazed windows were used. Photo-voltaic and solar hot water panels were installed on the asphalt shingle roof. The exterior walls consist of SIPS (Structural Insulated Panels).

Naylor & Breen performed the concrete, framing, exterior and interior finishes. Hawk Hill Cabinetry & Custom Woodwork performed much of the interior finishes such as the kitchen cabinetry, stairs and trim details. Low VOC paints were used throughout in the interior and exterior of this home and on the cabinetry and casework.

Project: Private Residence
Plymouth, VT

Architect: Haynes & Garthwaite
Architect: Byron Haynes
(802) 649-3606

Project Manager: Tanner Romano
Superintendent: Kerry Wetmore
Completed: 2009

“Working with a professional construction company like Naylor & Breen is a pleasure. This Plymouth residence is the first LEED home that our firm has built. In order to successfully complete the LEED certification process the cooperation and support of an organized firm is essential. In all facets of completing a LEED project, from tracking down sources of local building materials to performance testing the building envelope, Naylor & Breen exceeded expectations. We had never worked with Naylor & Breen before this project but we were impressed with their attention to detail, their management skills and the quality of their finish carpentry and cabinetwork. We have since worked with Naylor & Breen on both commercial and residential projects and because of these successful collaborations we continue to recommend them to our clients.”
